

CONGO GLOBAL SOLUTIONS

— CGS SARL

Your trusted partner for mining supply & support services

A Congolese company built for the copper belt

Congo Global Solutions (CGS SARL) is a Congolese company specialised in the supply of industrial goods, support services for mining operations, and general services management for mining, industrial and construction companies across the Democratic Republic of the Congo.

From our head office in Lubumbashi (Haut-Katanga) and our operations base in Kolwezi (Lualaba), we sit at the heart of the DRC's copper and cobalt belt — close to the mines we serve, and able to respond fast.

Our mission is to deliver reliable, competitive solutions tailored to each client's needs, guaranteeing the availability of the products and services that keep mining operations running.

Our vision

To become a reference supplier and partner in the DRC's mining and industrial sector — recognised for service quality, responsiveness and a commitment to operational excellence.

Our mission

- ✓ Supply goods and services that meet mining-industry standards
- ✓ Guarantee fast, dependable procurement and delivery
- ✓ Help improve our clients' productivity
- ✓ Build lasting partnerships with mining operators

Safety

Safety sits at the heart of everything we do.

Quality

Products and services aligned with industry best practice.

Integrity

We work with honesty, transparency and professionalism.

Client satisfaction

Our clients' needs drive every operation.

Congolese-owned SARL

OUR VALUES

Four service lines, one point of contact

CGS combines procurement muscle, an in-house engineering office and on-site services, so mining and industrial operators can consolidate suppliers and simplify their supply chain — from studies to daily operations.

01

Industrial & mining supply

Equipment, spare parts, lubricants, PPE and consumables — backed by a reliable supplier network.

02

Engineering & project studies

Feasibility studies, cahiers des charges, civil works and studies for industrial installations — led by civil engineers.

03

Catering services

Balanced, safe meals for mine sites, camps and events, prepared to strict hygiene standards.

04

Cleaning & facility management

Industrial and office cleaning, maintenance and site services that keep facilities productive.

WHO WE SERVE

Mining companies

Mining subcontractors

Processing industries

Construction companies

NGOs & institutions

Public & private organisations

Industrial & mining supply

A wide range of equipment, consumables and parts for mining and industrial operations — one order, one invoice, one accountable partner. Most of our articles are sourced through our representation in Johannesburg, South Africa, giving clients direct access to certified South African and international brands.

Mechanical & industrial equipment

- Industrial, submersible & drainage pumps
- Air compressors & generators
- Electric motors & industrial gearboxes
- Industrial piping, valves & hydraulic fittings

Parts & accessories

- Bearings, belts & industrial seals
- Filters & hydraulic hoses
- Industrial bolts & fasteners
- Industrial cables & electrical accessories

General supplies

- Office supplies & furniture
- Cleaning & maintenance products
- IT equipment & consumables

Lubricants & consumables

- Hydraulic, engine & transmission oils
- Industrial greases & specialised lubricants
- Coolants
- Industrial cleaning products

Safety equipment (PPE)

- Safety helmets, boots & industrial gloves
- Protective eyewear & respiratory masks
- High-visibility clothing
- Safety harnesses

Engineering & project studies

An in-house engineering office led by qualified civil engineers, supporting mining and industrial operators from first feasibility assessment to tender documents and works supervision — for projects such as acid-plant erection, storage facilities and site infrastructure.

Feasibility & pre-feasibility studies

- Technical & economic feasibility assessments
- Site investigations & options analysis
- Preliminary designs & layouts
- CAPEX / OPEX estimates

Civil & structural works

- Design of foundations, platforms & structures
- Drainage, roads & earthworks studies
- Reinforced-concrete & steel structure studies
- Supervision of civil works

Storage & logistics infrastructure

- Warehouses & workshop facilities
- Fuel & reagent storage, containment & bunding
- Stockyards & laydown areas
- Weighbridges & access infrastructure

Tender documents (cahier des charges)

- Terms of reference & technical specifications
- Bills of quantities (BOQ)
- Tender preparation & bid-evaluation support
- Contract documentation

Industrial plant projects

- Studies for acid-plant erection projects
- Process buildings & equipment foundations
- Utilities & services integration
- Constructability reviews

Project management & supervision

- Planning & progress reporting
- QA/QC of works
- HSE oversight on site
- Handover & close-out documentation

Catering services

Food service designed for the realities of mine sites and industrial facilities: consistent quality, strict hygiene, dependable delivery — every shift, every day.

Meal preparation & distribution

Full-cycle preparation and service for workforces of any size.

Canteen management

End-to-end operation of client canteens and mess facilities.

Mining-camp catering

Structured meal programmes for remote camps and rotations.

Corporate & event catering

Professional catering for meetings, ceremonies and events.

Snacks & beverages

Supply of snacks, refreshments and beverages.

Meal delivery to operational sites

Hot, safe meals delivered directly to the work front.

Our commitment

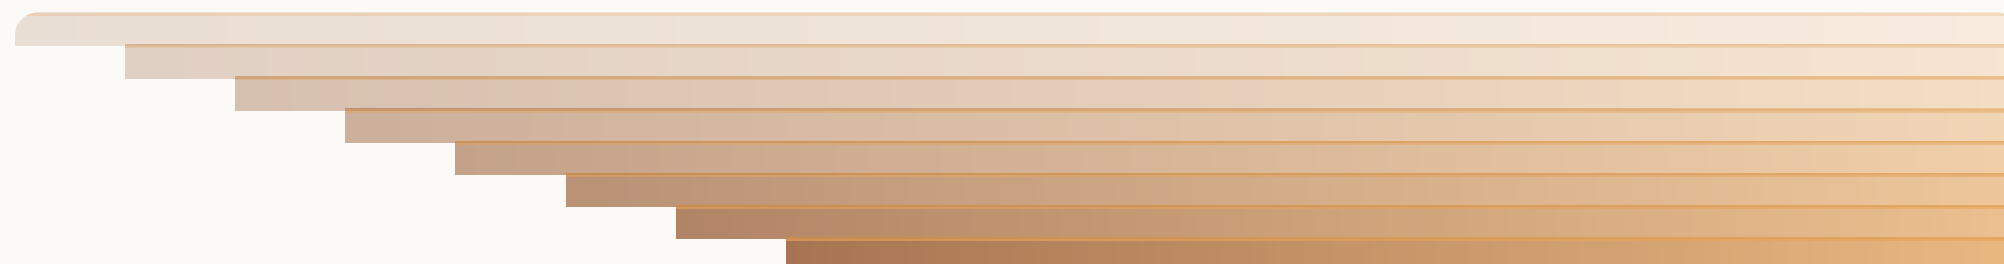

Balanced, healthy menus prepared and served in line with food hygiene and safety standards — because a well-fed team is a safe, productive team.

Cleaning & facility management

Cleaning and upkeep services for mine sites, offices, warehouses and camps — flexible teams, industrial standards, HSE discipline.

- ✓ Office cleaning
- ✓ Industrial cleaning
- ✓ Building maintenance
- ✓ Non-hazardous waste management
- ✓ Disinfection of premises
- ✓ Post-works cleaning
- ✓ Green-space maintenance
- ✓ Laundry services

Your gateway to the DRC mining market

Beyond our own service lines, CGS acts as a local representative, agent and distributor for international manufacturers and service providers — with a particular focus on South African companies — seeking access to the mining operations of Haut-Katanga and Lualaba. Our representation office in Germiston (Johannesburg), Gauteng, anchors our sourcing and partner relationships in South Africa.

Local representation & agency

We represent your brand in the DRC — commercially, administratively and on site — so you have a permanent presence without opening a local entity.

Market entry & business development

Introductions to mining operators and subcontractors, participation in tenders, and structured follow-up of opportunities in Lubumbashi and Kolwezi.

Vendor registration & compliance

CGS holds every registration required to contract in the DRC (RCCM, Id. Nat., NIF, CNSS, INPP, ONEM). Your products reach clients through a fully compliant local partner.

Import, distribution & logistics

Import for resale, customs coordination, warehousing and last-mile delivery to mine sites — under our OHADA-registered trading objects.

Bilingual liaison

French-English commercial and technical liaison between your teams and Congolese clients, contracts and administrations.

After-sales presence

Local follow-up, coordination of technical interventions and a permanent point of contact for your DRC clients.

We are actively building a portfolio of South African and international partners. If your company is looking for a reliable route into the DRC mining market, let's talk.

Why partners choose Congo Global Solutions

-  **A dynamic, flexible Congolese company**
 Local roots, local knowledge — and the agility to adapt to each client's constraints.
-  **Responsive order management**
 Fast quotation, procurement and delivery cycles that respect operational deadlines.
-  **Solutions tailored to each client**
 We adapt scope, volumes and logistics to the specific needs of every site.
-  **HSE compliance**
 Health, Safety & Environment standards respected across all our activities.
-  **A reliable supplier network**
 Vetted sourcing channels in South Africa and beyond, guaranteeing availability and consistent quality.
-  **Competitive pricing**
 Sharp pricing without compromising on quality or lead times.

A fully registered, compliant partner

CGS SARL is incorporated under OHADA law and holds all registrations required to contract with mining operators, institutions and international partners in the DRC.
